

Krithika Subramanian

Objective

Graduate Information Technology student having 4 years of industry experience in Application Development seeking Internship and Full-Time employment opportunities.

Academic Projects

- PROJECT: Trip Planner using AngularJS

Created an application which had a functionality similar to kayak.com. Developed a highly interactive web-based application utilizing AngularJS, NodeJS, HTML5, CSS and Restful APIs, MongoDB (MEAN Stack).

- PROJECT: Analyzing Google Playstore Data

Used data from Kaggle to identify mobile apps that are profitable for the Google Play markets.

Work History

Sanmina Corporation - Programmer Analyst

01/2012 - 04/2016

- Assessed business needs and problem areas from order placement to shipping in Sanmina owned facility & translated it to efficient functional logic for building the application from the ground up.
- Developed a dynamic application using AngularJS, HTML5, CSS2, JavaScript.
- Used AngularJS as framework to an application which can bind data to specific views and synchronize data with server.
- Built databases and table structures following PL/SQL architecture methodology for web applications.
- Created a cross browser/cross device compatible application with an emphasis on Responsive Design principles.
- Constructed test cases, found critical defects and received accolades for less than 1% defects during system acceptance testing.
